## The Hesper Tragedy.

A late Coast exchange says that Herman Sparf, under sentence of death, has been acquitted on his second trial and the chances are that Hans Hansen and Thomas St. Clair, the men convicted on joint trial with him of the murder of Mate M. Fitzgerald of the bark Hesper, will either get a commutation of their sentence or a new trial.

Sparf's case was tried with great patience, and his attorneys, C. W. M. Smith and J. J. Kierce, made a most able defense. In fact although the charge of the Judge was decidedly in favor of the prisoner, still the verdict of "Not guilty" was surprise to those who had followed the case. Smith made a masterly closing speech on behalf of the prisoner and all that United States District Attorney Foote could say on his side of the case could not shake the opinion of the jurors.

Messrs. Kierce and Smith have defended the prisoners without fee and the expenses of the various trials have been paid out of their own pockets. Now that Sparf has been acquitted they expect a nolle prosequi in the case of Hansen and a commutation in that of St. Clair.

# National Cane Shredder

PATENTED UNDER THE LAWS OF THE HAWAIIAN ISLANDS.

Mr. John A. Scott, Manager of the Hilo Sugar Company, gives the following wonderful record of the working of the NATIONAL CANE SHREDDER, which was erected by their works at the commencement of the crop just harvested:

"During the past week the Hilo Sugar Company's mill exceeded any of its former records by closing the 125 hours grinding with an output of 3694 tons. This is fully 10 percent more than the best work of former years."

"The three roller mill being 26 in. by 54 in. and the two roller mill 30 in. by 60 in. The first mill doing this amount of work in an efficient manner and with great ease, compared with work on whole cane, owing to thorough preparation of the cane by the National Cane Shredder, recently erected by the Company."

"And by its use the extraction has been increased from 3 percent to 5 percent on all kinds of cane, and in some cases 80 percent has been reached; the average being 75 to 78 percent, according to quality."

"I continue to find the megasse from shredded cane better fuel than from whole cane."

"The shredder has been working day and night for seven months and has given me entire satisfaction, having shredded during that time about seventy thousand tons of cane, and a large part of it being hard ratoons."

"The shredder and engine require very little care or attention."

Plans and specifications of these Shredders may be seen at the office of
